

I am disturbed to hear that the FCC is trying to control what I am able to listen to through a service that I pay for. The NAB should instead focus their attention on trying to find the reason people like me have switched to satellite service. I am able to control what and who I listen to, I do not have to put up with 6 minutes or more of commercials and endless chatter. Please do not put this kind of control on a service I switched to out of frustration with the regular radio stations. PLEASE!!Thank you for listening!
